Receipt is acknowledged of the preliminary amendment filed November 30, 2004, which has been entered in the file.

The first two pages of the information disclosure statement filed May 19, 2005 were received. However, form PTO-1449 and any references that were enclosed are not of record in the file. Applicants should resubmit the references and PTO-1449 along with the postcard receipt to have them considered.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 4, 6, 13, 17, 21, 25 and 28 to 30 are rejected under 35 U.S.C. 102(a) as being anticipated by Tornoe et al. (J. Org. Chem., 67(9), 3057-3064, April 2, 2002), cited.

The reference discloses the claimed process which comprises using a catalytic amount of copper (I) to catalyze a click chemistry ligation reaction between a reactant having a terminal alkyne moiety and a reactant having an azide moiety to form a product having a triazole moiety. Note the Experimental section on pages 3061 to 3063 for preparation of 1,2,3-triazole compounds by derivitizing an amine containing compound to form a

terminal alkyne then reacting the product with an azide to form the 1,2,3,-triazole. The copper (I) is coordinated to a halide ion.

Claims 1 to 3, 8 to 12, 15, 16, 23, 24, 26 and 27 are allowed.

Claims 5, 7, 14, 18 to 20 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The references made of record and not relied upon show the state of the art.
